Vectair V-Air® SOLID multi-phasing passive air
freshener with sub-micron fragrance technology.

VECTAIR
V-AIR®
SOLID

Multi-phasing, sub-micron technology. VOC exempt.

VOC exempt

Vectair V-Air® SOLID is environmentally friendly.

It is completely free of any harmful solvents, propellants, HFCs and is VOC exempt – it is the truly safe solution for your aircare needs. The refill is made from natural ingredients & the dispenser(s), recyclable.

No batteries required

Vectair V-Air® SOLID contains no batteries.

It is designed so that it does not need any external power source such as oxygen or hydrogen fuel cells, and it doesn't rely on gravity – all it needs to work is natural airflow.

Sub-micron technology

Vectair V-Air® SOLID utilizes pioneering multi-phasing sub-micron technology.

The Vectair V-Air® SOLID particles enable superior fragrance delivery, yet are sized typically below 1.0 micron. This means they are much smaller and lighter than the particles in other fragrance systems, remaining airborne for many hours. This makes Vectair V-Air® SOLID highly effective whilst being safe for public areas and continuous exposure.

How does it work?

Vectair V-Air® SOLID incorporating sub-micron technology is made up of a unique solid capsule and a fragrance core.

This, combined with a passive dispenser, delivers consistent fragrance intensity.

The solid capsule is infused with high quality perfumes, then complemented by an integrated internal fragrance core. These combine and diffuse powerful key fragrance notes that are subtly different. The diffusion rate of fragrance moving through the solid capsule is much different to the fragrance evaporating from the surface of the fragrance core. This means that the start fragrance transforms into something very different over time.

These blends of complementary but differing fragrance notes specifically eliminate fragrance fatigue in a revolutionary way, all from one single passive aircare system.

Vectair V-Air[®] SOLID multi-phasing passive air freshener.

Science made simple

Technology doesn't have to be technical. In fact, science can make things simple.

The technology behind Vectair V-Air[®] SOLID is packed into one powerful refill component, so we've done the hard work for you – no fuss, just fragrance. A fully recyclable retaining clip attaches the refill to the dispenser.

Harmonized fragrances

Part of the 'Harmonize Your World' range of air fresheners.

Whether you need urinal screens placed in a men's urinal, a passive air freshener in a general restroom area or a discreet fragrance solution in separate toilet stalls, our aircare solutions complement each other with matching fragrances. Creating one, collective wave of fine fragrance throughout each product's life cycle. Clever, right?.

No leaks

Vectair V-Air[®] SOLID contains no liquids so won't spill, even if it is knocked over.

This ensures safety in use and in transportation. Vectair V-Air[®] SOLID is unaffected by climatic conditions, the most common cause of passive cartridges failing. It will not dry out during its lifetime like traditional gel systems.

Vectair V-Air[®] SOLID. Multi-phasing, sub-micron fragrance technology packed into just 1 single component. The science in Vectair V-Air[®] SOLID speaks for itself.

Odor neutralizer & odor counteractant

Contains our proprietary 'Airadicate'[™] to help combat bad odors.

Vectair V-Air[®] SOLID refills contain the Vectair 'Airadicate'[™] odor neutralizer and TEG odor counteractant to help reduce & stop bad odors in their tracks. Zero attaches to malodorous molecules, pulling them out of the air and leaving behind just the right amount of essential oil.
